PROJECTS :

Hotel Reservation System

- Developed a robust hotel reservation site script with HTML, CSS, PHP, and MySQL.
- Prioritizing user-friendly features like room availability search and seamless inventory browsing.
- Implemented a payment and SMS booking confirmations, elevating the site's functionality for effective and efficient hotel management.

Java Invoice Generator

- I crafted a Java application utilizing Spring Boot for robust backend management.
- Facilitating the generation of detailed customer bills and invoices.
- This system seamlessly integrates Java, Spring Boot, and specific functionalities for efficient hotel bill and invoice generation.

Servify.io

- Servify.io revolutionizes the service-finding experience, offering a dynamic and user-friendly web platform meticulously crafted to simplify the process of discovering dependable service providers for everyday tasks.
- The website seamlessly connects users with sought-after services like plumbing, cleaning, and electrical work.
- Users effortlessly engage with trusted professionals, and the platform meticulously ensures a seamless user experience while curating high-quality matches between users and service providers.

LANGUAGES : ENGLISH(FLUENT), HINDI(PROFICIENT), MARATHI(NATIVE)

HOBBIES : Reading Books, Chess, Swimming.
